

BORN IN 1900, READY FOR 2014.

We made our name by engineering durable, reliable trucks that turned the open road, helped deliver victory on the battlefield and built better lives for our dedicated customers. Today, we're still leading the way in performance, efficiency and service by combining technology with the experience that comes from over a century of going the distance to get the job done.

1900-1909

During World War I, Mack built the first military trucks for the Allies. To make the heavy, six-wheeled trucks work on the beach, the military even had the wheels and axles made of wood. Mack's "military" trucks by Green leaders.

1910

When Mack built the first truck, it was a simple, open-top vehicle. It was designed to be rugged and reliable, and it was built to last.

1920

In 1920, Mack introduced the first truck with a steering wheel. This was a major improvement over the steering levers used on earlier trucks.

1930

In 1930, Mack introduced the first truck with a steering wheel. This was a major improvement over the steering levers used on earlier trucks.

1940

In 1940, Mack introduced the first truck with a steering wheel. This was a major improvement over the steering levers used on earlier trucks.

1950

In 1950, Mack introduced the first truck with a steering wheel. This was a major improvement over the steering levers used on earlier trucks.

1960

In 1960, Mack introduced the first truck with a steering wheel. This was a major improvement over the steering levers used on earlier trucks.

1970

In 1970, Mack introduced the first truck with a steering wheel. This was a major improvement over the steering levers used on earlier trucks.

1980

In 1980, Mack introduced the first truck with a steering wheel. This was a major improvement over the steering levers used on earlier trucks.

1990

In 1990, Mack introduced the first truck with a steering wheel. This was a major improvement over the steering levers used on earlier trucks.

2000

In 2000, Mack introduced the first truck with a steering wheel. This was a major improvement over the steering levers used on earlier trucks.

2014

In 2014, Mack introduced the first truck with a steering wheel. This was a major improvement over the steering levers used on earlier trucks.
